CEREC Connect®

Quick Start Guide
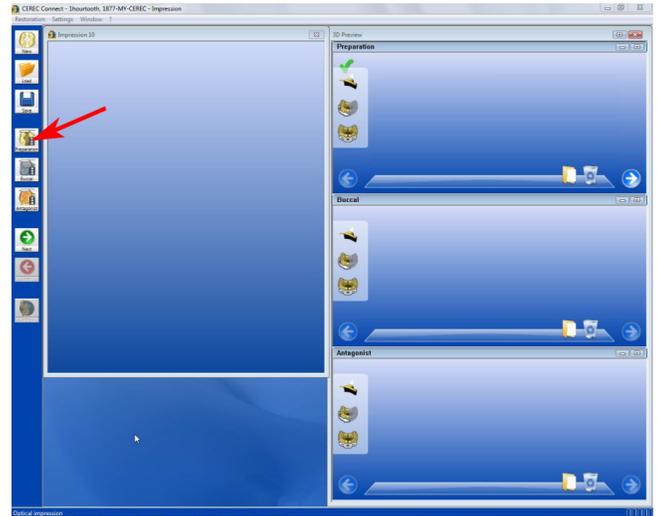

CEREC Connect® Software V3.85
## Full-Arch

1) Make sure the appropriate side is selected.

2) Place the cursor on "Preparation" icon to begin images acquisition, start from posterior most.

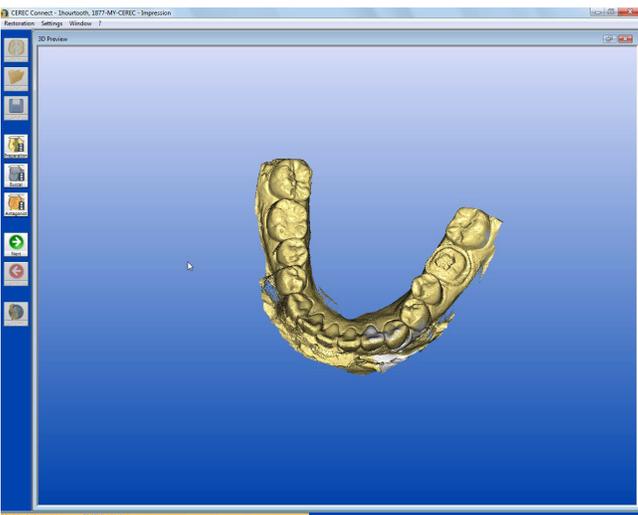

*3) Complete taking all images in the quadrant, pass the midline by at least two teeth.*

4) Chose the opposite side and take all the images in that quadrant, again pass the midline by at least two teeth.

5) When finished taking images for both quadrants, make sure there is enough overlap in the midline, click "joint" icon.

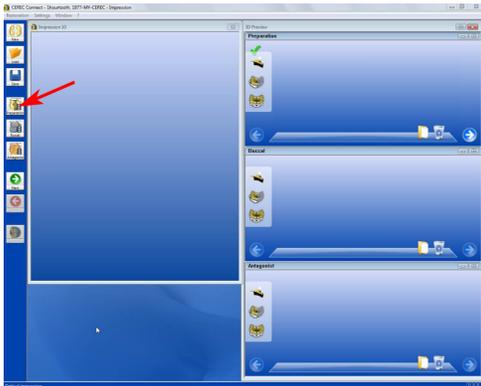

6) If proper overlapping images are acquired, the model will be stitched together.

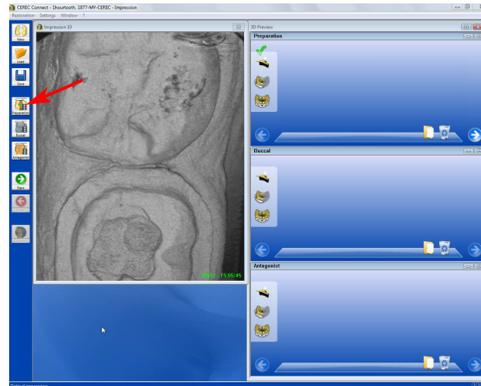

7) Perform the same steps for the opposing arch, follow with images of the buccal bite.
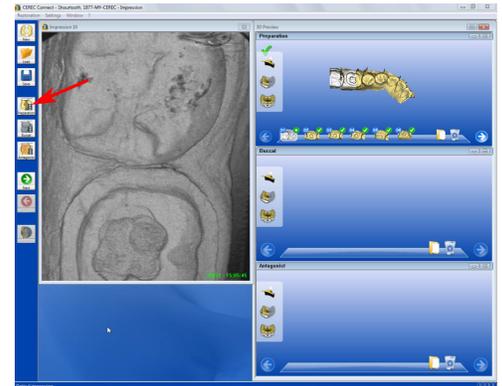

CEREC Connect® Software V3.85
## Buccal Scan

1) Place cursor on "Preparation" icon to begin.

2) Start with distal most tooth, moving forward

3) Complete all images of prep arch.

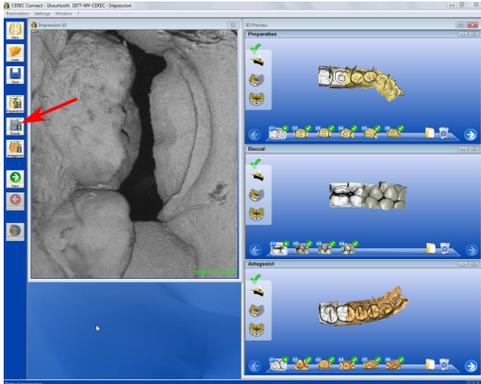

4) Move cursor to "Antagonist" icon.

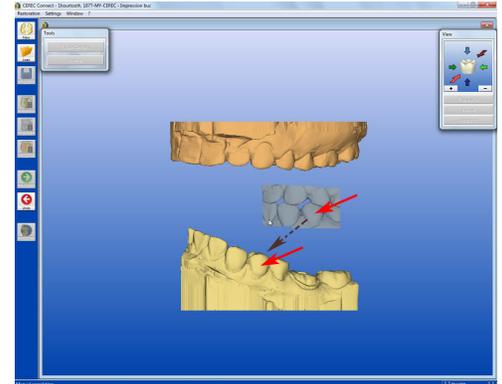

5) Complete antagonist images.

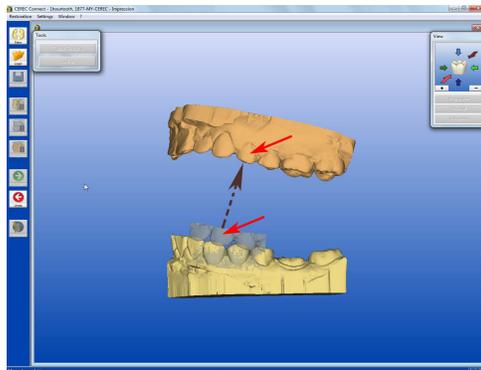

6) Move cursor to "Buccal" icon.

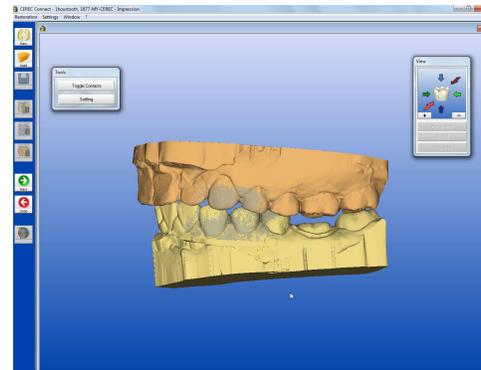

7) Capture 2 to 3 buccal images.

8) Click on (Green Arrow) "Next" icon.

9) Drag buccal image on to the same tooth.

10) again, drag buccal image to same tooth.

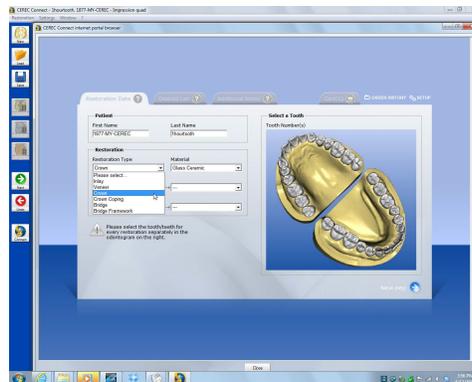

11) Buccal bite completely stitched.

12) Click on "Toggle Contacts" to verify.
